Professional Positions

9.2016 – Present Professor, Departments of Psychology (with Tenure) and Psychiatry, Research Professor, Survey Research Center, University of Michigan, Ann Arbor, MI

7.2020 – Present Associate Chair for Faculty Development, Psychology, UM

7.2017 – 6.2018 Associate Chair for Faculty Development (interim), Psychology, UM

10.2022– Present Affiliate, Michigan Neuroscience Institute, UM

7.2015 – 6.2017 Chair, Developmental Area, Psychology, UM

6.2016 – Present Co-Director, NICHD T32 Developmental Psychology Training Grant

9.2011 – 8.2016 Associate Professor, Departments of Psychology (with Tenure) and Psychiatry, Research Associate Professor, Center for Human Growth and Development, University of Michigan, Ann Arbor, MI

6.2014 – 8.2016 Faculty Associate, Survey Research Center, Institute for Social Research

1.2012 – 5.2014 Faculty Associate, Youth and Social Issues, Institute for Social Research

4.2008 – Present Faculty Member, Neuroscience Program, University of Michigan

9.2018 – 8.2020 Faculty Member, Center for Human Growth and Development, University of Michigan

6.2006 – 8.2011 Assistant Professor, Department of Psychiatry, University of Michigan

9.2005 – 8.2011 Assistant Professor, Department of Psychology, Research Assistant Professor, Center for Human Growth and Development, University of Michigan, Ann Arbor, MI

2.2005 – 8.2005 Research Fellow, National Institute of Mental Health, Bethesda, MD.

4.2003 – 8.2005 Research Career Award (K22) Recipient, National Institute of Mental Health

1.1999 – 8.1999 Graduate Research Assistant, Institute of Child Development, University of Minnesota, funded by the National Institutes of Health, supervisor: Dr. Charles A. Nelson

9.1996 – 6.1997 Graduate Research Assistant, Institute of Child Development and Dept. of Radiology, University of Minnesota, funded by the John D. and Catherine T. MacArthur Foundation, supervisor: Charles, A. Nelson, Ph.D.

1.1995 – 8.1995 Research Technician, Infant Primate Research Lab, Regional Primate Center, University of Washington

Training and Education

8.2000 – 3.2003 Postdoctoral Fellow, Section on Development and Affective Neuroscience, Mood and Anxiety Disorders Program, National Institute of Mental Health, Bethesda, MD (Advisor: Daniel S. Pine, M.D.)

9.1995 – 7.2000 Ph.D., Child Psychology (minor in Neuroscience), awarded July 2000; Advisor: Charles A. Nelson, Ph.D. Institute of Child Development, University of Minnesota, Minneapolis, MN. Dissertation Title: *The Effects of Hydrocortisone on Neural and Cognitive Function: An Electrophysiological and Behavioral Investigation*.

3.1992 – 6.1995 B.A. Psychology, awarded June 1995, University of Washington, Seattle, WA

9.1987 – 5.1991 B.A. English, awarded May 1991, Tufts University, Medford, MA

Computational examination of RDoC threat and reward constructs in a representative, predominantly low-income, longitudinal sample at increased risk for internalizing disorders

The goal of this project is to apply computational approaches to evaluate the validity of RDoC constructs at multiple levels of analysis (brain, behavior, symptom) in a large, longitudinal, developmental sample that is disproportionately affected by adversity. A supplement was added in year 2 to assess the wellbeing of the participants during the COVID-19 pandemic (\$156,961 total).

Structural Racism and Black American Mental Health: Neurophysiological Mechanisms and Sociocultural Processes Promoting Resilience During the Transition to Adulthood

The project will elucidate the links between specific neighborhood and societal indicators of structural racism and subsequent mental health, as well as stress-related neurophysiological mechanisms and sociocultural buffers that account for and influence this link.

The longitudinal impact of the COVID-19 pandemic and related multi-level mitigation and contextual factors on health and socioeconomic outcomes of individuals and families from a vulnerable population

The study is examining the short- and long-term health, social and economic effects of the COVID-19 pandemic on an underserved and vulnerable population of young adults who have been followed since birth as well as how brain development mediates mental health outcomes. Moreover, planned linkages to multilevel COVID-19 related health, social, and economic measures will be incorporated to identify how temporal and geographic variations contribute to outcomes of the two-generation sample.

Epigenetic Mediation of Adverse Social Context on Stress Response, Socioemotional Development, and Health in a Population-based Study of Minority and Low SES Children and Adolescents

Building on an existing representative study of children, this proposal will 1) assemble epigenome-wide data on 2,000 children at two points in time, 2) describe methylation patterns in 3 race/ethnic groups and across SES levels, and 3) explicate epigenetic associations with social adversity, biological processes, and socioemotional development.

Effects of Poverty on Affective Development: A Multi-Level, Longitudinal Study

The objective of this project is to better understand how poverty affects biology during development and contributes to increased risk for psychopathology. A supplement was added in year 2 to examine epigenetic markers in this sample (\$308,711 total). Finally, an administrative supplement was added to facilitate data sharing (\$63,645 total for years 1 and 2).

Dimensional Brain Behavior Predictors of CBT Outcomes in Pediatric Anxiety

This project addresses two fundamental and open questions: 1) Do individual differences in CBT-relevant brain-behavioral patterns lead to variation in CBT outcomes? and 2) Does development contribute to this variation? To answer these questions, we are collecting multimodal neuroimaging data in the context of a randomized control trial of children and adolescents with impairing anxiety.

Neurodevelopmental Pathways in Adolescent Health Risk Behavior

The expected outcomes of the proposed research will have an important positive impact in that they will provide information about the developmental mechanisms contributing to risk behaviors essential to improving and developing new preventive interventions to reduce the population health burden arising from behavioral misadventure in the adolescent and young adult years. Identifying the psychosocial, neurocognitive, and neural mechanisms that contribute to health risk behaviors holds promise for improving our ability to effectively address the significant costs of behavioral misadventure, the leading source of population health risks during adolescence.
